CHECKLIST – Improve Cash-Flow

How many ways can you can improve cash-flow?

The answer is 48!

Cash-flow is about money moving through your business. While more sales should generate more money, often a sales burst can increase the amounts owed rather than directing those extra funds to your fingertips.

This may come as a surprise, but it isn't tricky math or regular investor injections that underpin great cash-flow. Communication is at the heart of it all; starting with clear sales techniques covering terms and conditions through to systematic debtors management – communication is critical.

- Are your Staff Supporting your Cash-flow?
- Are your Systems & Resources at their most effective for cash flow optimisation?
- Are your Processes efficient at releasing cash?
- Are your Suppliers & Inventory having an adverse cash impact?

This checklist looks at how and where cash gets stuck in your business so you can improve Cash-flow forever.

Remember, it may take a few months to get from where you are to where you need to be, but each change will bring you a little closer to a stronger cash flow.
