Description

Profit Solutions

Discovering hidden profits in your business.

- Do you work your butt off but not see any real return?
- Do you have non-profitable revenue streams?
- Do your accounts have errors and mis-allocations?
- Are your Systems and Processes designed to maximise profit?
- Are your Suppliers & Inventory profiting at your expense?

Most businesses have profit issues, often focusing on minimising tax instead of targeting business returns! It needn't be this way!

The Sales and Marketing Dudes have for years been telling us the more sales you make the more profit you will have!

But the truth is if you increase the number of sales flowing through an already broken system it will usually cause more drama than profit.

Eve Diamond's Profit Solutions cover:

1. **Inflows** – Pricing, Margins, and Product Mixes
2. **Leaks** – Direct Costs and Indirect Costs,
3. **Systems** – Wastage, Terms and Conditions and Processes

I loved the fact that you said you like working with entrepreneurs (which I am). This tells me you have an understanding of our mindset. You are also not (excuse the pun) BORING! Entrepreneurs tend to be high voltage energetic creaturesâ?!.so boring wonâ??t sell to us. We need to be enthused and you have successfully nailed this.

How it works

For small issues, or low hanging fruit â?? this entire process can be accomplished in a few hoursâ?!

How long we work together is entirely up to you.
